

UH Computer/Smart Device Survey

College of Natural Sciences and Mathematics (NSM)

The UH Computer/Smart Device Survey was delivered to the faculty and staff of the Natural Science and Mathematics (NSM) College on August 5, 2020. The number of respondents to the survey stands at $n = 102$. We performed descriptive analysis on the curated data set. Specifically, for every question we composed two plots: a) A bar plot that shows the absolute counts for each relevant category. b) A pie chart that shows the percentages for the key relevant categories.
