

UH Computer/Smart Device Survey

College of Natural Sciences and Mathematics (NSM)

The UH Computer/Smart Device Survey was delivered to the students of the Natural Science and Mathematics (NSM) College on June 22, 2020. The number of respondents to the survey stands at $n = 357$. We performed descriptive analysis on the curated data set. Specifically, for every question we composed two plots: a) A bar plot that shows the absolute counts for each relevant category. b) A pie chart that shows the percentages for the key relevant categories.
